PROJECTS

Forkify Recipe App

HTML5, CSS3, & Javascript

- The Forkify Recipe App allows users to search for recipes.
- Users can view the recipe along with the cook time and also increase or decrease the amount of servings they need.
- Bookmarked recipes are stored in local storage so no database was required for this application.

Fast Pizza App

React JS, Redux & Tailwind CSS

- The fast Pizza App is a pizza order and delivery app which has real world functionalities such as adding a pizza, deleting a pizza, increasing or decreasing the quantity of the pizza.
- It was built using React JS and styled using Tailwind CSS which is responsive on all sizes.

House Market Place App

HTML5, CSS3, React Js

- A House Market Place App is a SPA which works fluently and elegantly as a native or desktop application.
- This app is a place where users can sell or rent their houses and also contact landlords to buy or rent their house.
- Google Authentication feature is also implemented using Firebase.
