Portfolio

Seeking an entry-level position as a MERN Stack Developer, bringing enthusiasm, dedication, and a strong desire to learn. Excited to apply my knowledge of MongoDB, Express.js, React.js, and Node.js gained through self-study and practical projects to contribute effectively to dynamic development teams. Committed to continuous improvement and eager to take on new challenges in the field of web development.

Projects

Forkify Recipe App

—Javascript

- Created the Forkify Recipe App, enabling seamless recipe searching and browsing. Implemented features include display of cook times, adjustable serving sizes, and a bookmarking function for saving recipes locally.

House Market Place

—CSS & React js

- Developed the House Market Place App, offering a seamless platform for users to sell, rent, and connect with landlords for housing needs. Integrated Google Authentication via Firebase to secure user accounts and sensitive data. Designed the app for fluent and elegant functionality on both mobile and desktop devices, ensuring a seamless user experience. Enabled easy property listing and interaction with potential buyers or renters, streamlining the housing search process.

Fast React Pizza App

—React js & Tailwind CSS

- Crafted the Fast React Pizza App with essential features including pizza addition, deletion, and quantity adjustment for a seamless ordering experience. Ensured full responsiveness across all device sizes, optimizing accessibility. Enhanced user satisfaction by delivering a user-friendly interface for streamlined pizza ordering and tracking, ultimately elevating customer experience

Snappy (Realtime Chat App)

—React js, Socket.io, Express js, Passport js & MongoDb

- Crafted "Snappy," an immersive chat experience powered by Socket.IO for real-time communication. With a sleek frontend built on React and a robust backend featuring Node.js and Express.js, Snappy ensures seamless messaging between users. Socket.IO enables instant message delivery, enhancing the immediacy of conversations.
